

# TOSSABLE CHEMICAL AGENT DISPERSER™

Designed for indoor use, this non-pyrotechnic, continuous discharge aerosol projector is perfect for vehicles, cell extractions and single-room clearing. Deploy from a distance, then step back (hands free) and let TCAD™ do its job. A rapid discharge time prevents throwback and the super light weight eliminates the possibility of use by an inmate or subject as a weapon.

TCAD™ is small, very effective and inexpensive. The days of lugging around huge “fire extinguisher” type aerosol projectors are gone, five (5) TCAD™ devices fit in just one (1) BDU trouser side pocket.

## OPERATIONAL STRENGTHS

- **Non-Pyrotechnic** – Flameless, no sparks & no possibility to ignite.
- **Aerosol Projector** – Fits suitably within agencies current aerosol policy.
- **Chemical Agent** – Exact match to standard aerosol projector formulation.
- **Required Training** – None, no special training required to deploy this device.
- **Officer Safety** – Deploy from a secure distance then back away with hands free.
- **Tactical / Practical** – When/if necessary, stagger deployment of multiple devices.
- **Compact Size** – Multiple devices can be carried on belt carrier and/or BDU side pockets.

2 oz. TCAD™ device

## MODEL NUMBERS

	2 oz.	4 oz.
US DoD	55395	55495
Level III	54395	54495
Level II	53395	53495
Level I	52395	52495
OC/CS	60395	60495
CS	65395	65495

## AEROSOL FORMULATIONS

Four (4) different strength levels of OC are available. These strength levels are commensurate with all competitive aerosols on the market today. CQB also manufacturers an OC/CS blend as well as CS tear gas only formulations. All CQB aerosol projectors are safe for use with TASER® brand energy weapons.

	Active Ingredient	Scoville Heat Units	Scoville Value	Total Capsaicinoids
US DoD *	5.5%	2,000,000	110,000	0.69%
Level III	10%	2,000,000	200,000	1.25%
Level II **	5.0%	2,000,000	100,000	0.62%
Level I	10%	500,000	50,000	0.31%

\* Currently in use by US DoD corrections personnel in Afghanistan and Iraq.

\*\* ODRC Approved
